Profile Summary

I have experience in creating user-friendly and visually appealing websites. Currently, I work in technical support, where I help solve problems and make sure systems run smoothly. I'm good at analyzing issues, working with others, and communicating clearly, and I always focus on delivering solutions that are efficient and easy for people to use.

Experience

Backfill Technical Support Engineer – UltraTech Cement Ltd. (UTCL), Rawan

- Providing comprehensive IT technical support and ensuring smooth system operations.
- Responsible for installation, configuration, and troubleshooting of desktops, laptops, and network peripherals.
- Managing user accounts, access control, and system monitoring.
- Supporting digital transformation initiatives within plant operations.

Junior Network Engineer Intern – UltraTech Cement Ltd. (UTCL), Rawan (March 2025 – May 2025)

- Installed and maintained IT systems, including Windows-based desktops, thin clients, and laptops.
- Managed OS updates, antivirus installations, and troubleshooting.
- Configured Microsoft Outlook, printers, and user workstations.
- Assisted with IT inventory and user system allocations.

Web Developer Trainee – Octanet Solutions (Remote) (May 2024 – June 2024)

- Designed and developed interactive, responsive web applications using HTML5, CSS3, JavaScript, and Bootstrap.
- Created a Personal Portfolio Website, optimized for speed and cross-browser compatibility.
- Collaborated with developers via Git & GitHub, gaining exposure to agile project workflows.
- Applied UI/UX design principles, ensuring accessibility and mobile responsiveness.
- Deployed final projects on Netlify, ensuring fast and reliable online performance.

Projects

Portfolio Website – HTML, CSS, JavaScript

Developed a responsive portfolio site to showcase skills, projects, and contact details. Focused on layout optimization, mobile responsiveness, and intuitive navigation.

Robust Search Engine with Efficient Structure and Minimal Time Complexity (June 2024 – August 2024)
Mentor: Prof. Wakil Gohri, Renaissance University, Indore

- Created a text-database management system to optimally process documents for executing fast and accurate search queries.
- Skills Used: C++, Python, OpenAI API, Llama-2, HTML, CSS, PHP.
